BAMBOO SOLUTIONS AND CADAC ORGANICE DELIVER MICROSOFT SHAREPOINT-BASED CAD DRAWING MANAGEMENT SOLUTION FOR SOCIAL SECURITY ADMINISTRATION

The self-serve portal enables employees to track, audit building changes for modification, renovation, and construction of U.S. facilities

RESTON, Virginia—November 4, 2010 – Bamboo® Solutions, the leading provider of technologies that enhance Microsoft® SharePoint®, and Cadac Organice Americas the leader in Engineering Solutions on SharePoint announced today the readiness of a Microsoft SharePoint-based CAD drawing management solution for the United States Social Security Administration (SSA). The combined Microsoft, Bamboo Solutions, and Cadac Organice solution provides a robust, self-serve environment which empowers SSA employees to track and audit building changes for ongoing modification, renovation, and construction of their facilities across the United States.

The agency's responsibilities include assigning Social Security numbers to U.S. citizens, maintaining earnings records for workers under their Social Security numbers, and administering the Supplemental Security Income program for the aged, blind, and disabled. Tasked with the mission to deliver these services while keeping in step with the changing needs of the public, the nationwide SSA facilities require regular modifications and renovations.

The self-serve portal application allows SSA employees, facility engineers, and CAD designers to efficiently and securely communicate information regarding the as-built condition of their facilities across the country. Utilizing Bamboo and Cadac Organice products, the SSA is able to utilize Microsoft SharePoint 2007 to better serve the very specialized requirements of their engineering drawing management application. Bamboo's Bulk Import and DWG Parser Solution Accelerator components make it easy to import large volumes of legacy files and drawings while automatically extracting and populating drawing title block information as SharePoint list data. Engineers who need to edit stored drawing files to reflect the as-built conditions can easily do so using Cadac Organice Explorer. Once a drawing file has reached an as-built state, it is published using Cadac Organice Publish into PDF and DWF formats. This ensures secure, read-only access to users who simply need to

FOR IMMEDIATE RELEASE

view and/or print files. Facility engineers, space/building managers, and others can browse the As-Built Drawing Repository using Bamboo's Tree View Web Part, or search for specific files using the Bamboo List Search Web Part. The solution optimizes team collaboration and provides secure drawing access to a wide variety of SSA personnel.

"Bamboo has been delivering products and services to the U.S. Government for many years. Partnering with companies like Cadac Organice has enabled us to support highly specialized applications, such as CAD Drawing Management, in SharePoint," says Julie Auletta, Director, Solutions Center, Bamboo Solutions.

"We have over 200 customers worldwide managing engineering projects and drawings within our SharePoint-based document management solution. Along with Microsoft and Bamboo, we are proud to also serve the U.S. Government with this solution and are grateful for the opportunity to contribute to an efficient workspace," says Edwin Elmendorp, President, Cadac Organice Americas.

The solution will go live in the fall of 2010 with plans currently underway to migrate to SharePoint 2010 in the near future. Visit the Bamboo website at www.bamboosolutions.com or visit Cadac Organice at www.organice.com for more information.

About Cadac Organice

Cadac Organice is a software suite for engineering document management and document control and is based entirely on Microsoft SharePoint. Cadac Organice helps project-driven organizations manage (project) documents and it automates document control and tracking using transmittals and workflows. Cadac Organice is easy to use, is instantly accepted by users and immediately improves business processes and results of project-driven organizations. For more information, please visit <http://www.organice.com>. About Bamboo Solutions

Bamboo Solutions, a Microsoft Gold-Certified partner, is a leading provider of software that helps organizations achieve business value through the use of Microsoft SharePoint. Bamboo offers its extensive library of web parts and accelerators for SharePoint, and provides SharePoint-based applications for use on-premise, or as on-demand applications. Over 4,500 organizations worldwide have chosen to implement solutions using products and applications from Bamboo. Bamboo Solutions is headquartered in Reston, Virginia, USA with
