

**FOR IMMEDIATE RELEASE**

**Bamboo Solutions Announces Its New User Management Solution Accelerator for SharePoint**

*Provides Single Administration Interface for Easily Managing User Information Access and Security Across SharePoint*

RESTON, Virginia – January 22, 2008 - Bamboo Solutions Corporation today announced the User Management Solution Accelerator for Microsoft SharePoint, a new first of its kind product that lets SharePoint administrators manage, maintain and organize user information through a unified interface. The User Management Solution Accelerator is designed to simplify the complex provisioning of user information access privileges across multiple sites, lists and subscriptions in a SharePoint environment.

Bamboo's User Management Solution Accelerator lets administrators create, modify or remove both users and groups, reset passwords and clone user accounts. It provides group control, multiple group access and secure data integrity with a single interface. Users across a SharePoint portal can be viewed by site, user name, organizational structure and group.

"Our User Management Solution Accelerator eliminates the countless hours of redundant effort that IT administrators presently spend to effectively manage user information access and security privileges across the entire SharePoint environment," said Mike Tanner, CEO, Bamboo Solutions Corporation. "Our User Management Solution Accelerator easily integrates into an existing SharePoint environment so that SharePoint administrators can quickly get the rewards of enhanced functionality and improved governance with fewer resources."

Pricing and Availability: The User Management Solution Accelerator is immediately available at Bamboo's Online Store ([www.bamboosolutions.com](http://www.bamboosolutions.com)). Pricing starts at \$1,000 for a 50 user license.

**About Bamboo Solutions**

Bamboo Solutions takes an innovative approach to enhancing and extending Microsoft SharePoint solutions. Bamboo provides a suite of Web Parts, Solution Accelerators and customized products for project management, social networking, business intelligence, portal administration and content management. In the last two years, over 3,100 customers across 38 countries have utilized Bamboo's offerings to implement their portals and enhancements in record time – exceeding customer expectations by delivering in weeks versus months or years.

SharePoint is the fastest selling Microsoft product of all time. Bamboo Solutions is a leader in the SharePoint market and has created a new development methodology for rapidly delivering new products. Bamboo's SharePoint and customer deployment experience, combined with its Development Community, significantly minimizes development time, resources and the cost of deploying collaborative SharePoint applications. Customers can easily try, test and buy from the online store and gain access to additional resources through Bamboo's partner network. Bamboo Solutions is headquartered in Reston, Virginia, USA, with offices in Gothenburg, Sweden and Ho Chi Minh City, Vietnam.
